Natural innovative products

VITAFOODS SINGAPORE 2019

Venus Roses
labsolutions®

10 years

VenusRoses Labsolutions is Bulgarian company specialized in the development and manufacturing of innovative formulations for private label dietary supplements using synergistic combinations of different ingredients of natural origin.

We are constantly innovating and developing new products to expand and refine our own product range.

We are able to design our own formulations and those of our customers.

Our R&D department ensures that all our products meet the relevant applicable regulatory requirements.

We will support your company in this regulatory process.

Our quality assurance team is responsible for establishing and monitoring control procedures to ensure products meet all quality requirements.

We are working closely with the scientific associations to meet the new requirements of the nutraceutical trends.
